

Environmental Policy

Transport / Waste / Energy Consumption : Significantly reduce our Environmental Impacts

As part of our Boccard Management System (PM2 BMS) and in line with the action already undertaken within the framework of our Corporate Social Responsibility (PM3), we want to act responsibly.

Our commitments to sustainable development:

- Ensure compliance with environmental regulations, contractual requirements and internal policies.
- Encourage environmental engagements, and engage our teams and stakeholders with its implementation.
- Develop awareness and communication to implement our policies and promote our environmentally friendly culture.
- Adopt at all levels company guidelines to reduce environmental impact.
- Promote environmentally friendly technologies and solutions in our projects.
- Focus on the reduction of energy consumption and optimization of the use of resources, in an optimum approach.
- Measure and track our results against our objectives and establish a continuous improvement process to measure and maximize our environmental performance.

We should have a long term commitment for the following :

- **Reduce our CO2 emissions related to our travels.**
- **Decrease our waste and maximize recycling.**
- **Optimize our resources consumption with a focus on reducing the energy required for our activities and the solutions we provide to our customers.**

We therefore request that all Managers adopt the following corporate initiatives :

- Assess the environmental aspects of our activities.
- Define the control elements and reduction targets of our significant environmental impacts in terms of **Transport, Waste and Consumption**.

We rely on each and every one of you to ensure that Boccard is exemplary in its approach for environmental protection !
