

bocPredict[®]

Success Through Digital

A maintenance solution based on Industrial IoT sensors and machine learning algorithms

Our solution allows you to foresee a failure and prevent them before they happen by providing your operators reliable, constant and reactive data.

Our predictive program enables the most efficient data-driven decision in order to receive the best outcomes.

TRACK

- Instant and real time data
- Machine uptime and efficiency

SAVE

- Money due to reduction in operating costs
- Time to repair
- Waste
- Electrical fires

OPTIMIZE

- Safety
- Mean time between failures
- Mean time to repair
- Energy consumption
- Production cost
- Unplanned maintenance
- Manufacturing performance

INCREASE

- Production capacity
- Machine uptime
- Manufacturing efficiency
- Equipment life expectancy
